

Description

The 7080-HD is the heavy duty version of the CalBench system. It incorporates a framework bench with robust steel endframes and cross braces to provide maximum reinforcement. The worktop is 2000 mm wide x 800 mm deep with 40 mm thick durable laminate finish with shock-proof edging (other tops available upon request). The frame consists of two top cross members with rear angled corner braces and single base cross member that is situated across the lower rear section of the bench.

All standard under worktop fittings are available, these include drawer and cabinet units, and PC/dry block calibrator holders. Additional fittings are also available. The standard CalBench arms and console are fitted to the heavy duty frame, with a perforated panel supplied (unless 7081 secondary console is ordered).

Features

- Heavy duty style, reinforced, steel section framework
- Heavy load bearing (up to 800 kg U.D.L. capacity)
- Bench frame finished with RAL 7035 light grey
- Durable light grey laminate worktop with shock proof edging
