

Description

The ADK12 kits have been developed to provide a selection of adaptors commonly used in pressure calibration. Each adaptor is manufactured from stainless steel and enables fast and secure connection of pressure instrumentation during testing applications.

Two kits are available for either 1/4" BSP to BSP, or 1/4" NPT to NPT. Each kit is supplied in a plastic case with compartments for quick and simple access to each fitting. PTFE tape, seals and washers are supplied.

These kits are suitable for use with the Time Electronics CalBench and with pressure generating devices such as portable and benchtop pressure pumps. Compact and practical, the ADK12 offers a quick solution to pressure component requirement in both the field and laboratory.
